

OPTIFUEL™

OptiMIX RACE

**The finest blends for ultimate
on track performance**

Designed for Racing

We have tested dozens of different combinations of nitromethane and exclusive Klotz synthetic oils to end up with the ideal fuel for diehard racers! Klotz is one of the most renowned racing oil brand in the world and its oils feature very low viscosity and flow through the carburettor with extreme efficiency, allowing the nitromethane to release maximum power and torque for each of our custom-tuned nitro blends.

Tested to Perform

OptiFuel drivers and RC professionals **Graham Alsop** (top UK racer, Hot Bodies team driver) and **Adam Skelding** (Hot Bodies, Edit RC) have spent hundreds of hours to determine the best-performing race fuels. Their input has given us the ability to provide a fuel that is perfect for all types and brands of racing engines and tuned pipes.

Race-Bred

The Optimix Race blend is formulated for more power, maximum speed, extra cooling, longer runtime and easier tuning compared to all other racing fuel brands. Experienced racers will find Optimix Race to be extremely efficient with up to 10% longer run times compared to leading race brands giving you the competitive edge in pit stop strategy. The exclusive oils in Optimix Race give you a consistent tuning window even in changing conditions. This leaves you more set up time to concentrate on other things!

**“OptiFUEL gives me
awesome power and
great runtime!”**

Graham Alsop
(top UK rallycross racer, Hot Bodies team driver)

**OptiMIX
RACE**

Features

- Optimum performance
- Smoother power
- Excellent throttle response
- Superior Fuel Economy

RACE Fuel

OptiMIX 25
RACE

25% Nitro
9% Synthetic Oil #OP2002 - 5 Litres [4/ Carton]

OptiMIX 30
RACE

30% Nitro
9% Synthetic Oil
